HVAC - HVAC/R and Solar ...

15 Years is an Average HVAC Expected Life. According to ASHRAE, most heating and cooling equipment can be expected to last 15 years with moderate or typical maintenance. In this scenario, the building owner, superintendent or property manager does their best to ensure the unit is cleaned yearly, and the air filters are changed on time.

Equipment lifetime for CRAC equipment is another input that does not justify usage of one single value for each equipment class. Therefore, for purposes of the LCC analysis, DOE assumed a distribution of equipment lifetimes between 10 and 25 years that are defined by Weibull survival functions, with an average value of 15 years.
