~~Telescope~~ **1. Using a Compass.** A compass is the next best alternative to night-time polar alignment using a pole star. Usually, it's accurate enough that you'll experience little to no field rotation when observing celestial objects.

~~How To Polar Align A Telescope During The Day ...~~  
Stay alert and keep on doing that in the horizon until your polar scope reaches that distinct point. You can use the knob that is marked as alt/az. Adjust the Inclination. This is the final step of aligning your telescope. However, if you are still confused that your

# Access Free How To Polar Align Your Nexstar 8i

Telescope is not pointing correctly, consider repeating the steps.

## ~~How to Polar Align a Telescope during the Day?~~

A good polar alignment can be achieved in five steps. First, point the tripod of the mount to the the north if you are in the northern hemisphere and south when you are in the southern hemisphere. Second, level your tripod. Third, put your mount into the correct latitude position.

## ~~Five tips to polar align your telescope mount like a pro ...~~

The simplest method of polar

# Access Free How To Polar Align Your Nexstar 8i

~~Telescope~~ Alignment is simply to aim the RA axis at Polaris. That seems simple enough but many beginners don't actually know how to find Polaris. If that's you – don't worry. I'll show you how to set your mount and telescope up to get aligned to Polaris.

~~Using an EQ Mount – Simple  
Polar Alignment for  
Beginners ...~~

Shift the polar axis left or right accordingly, until there is no more drift. Now aim at a star that's near the celestial equator low in the eastern sky. If the star drifts south, the polar axis points too low. If the star drifts north, the polar axis

~~Accurate Polar Alignment  
with Your Telescope — Sky~~

~~---~~

Polar Alignment with  
SharpCap Pro. Align the RA  
Axis of your  
astrophotography mount to  
the North Celestial Pole  
using Polar Alignment in  
SharpCap Pro. This procedure  
is quick and easy and can  
make a huge difference to  
your astrophotography.

SharpCap Pro introduced the  
Polar Alignment feature in  
version 2.9, and backyard  
astrophotographers have been  
taking advantage ever since.

~~Fine Tune Your Polar~~

## ~~Alignment in SharpCap [Step by Step]~~

When you'll level it out,  
your RA axis will be  
parralel to the Earth's axis  
and you'll be very close to  
be Polar Aligned. There is  
another thing left to do  
after all of the steps  
above. I turn the mount on  
and feed the handset with  
all the current data and  
proceed to Star Alignment  
procedure.

## ~~Polar Alignment when Polaris not visible~~

Set up your mount as you  
would for polar alignment.  
The DEC setting circle  
should read 90 degrees.  
Rotate the telescope in

mount (between the tripod legs) and lay a protractor on the ground ...

~~How can I polar align in the daytime? — Sky & Telescope~~

~~...~~

Attaching your smartphone over the front of your polar finder works just as well. For German equatorial mounts without a polar scope, set the Declination to  $+90^\circ$  and attach your smartphone to your telescope or camera's lens cap. Spencer R. Rackley IV Next, set up your mount with the polar axis pointed close to North.

~~Daylight Polar Alignment Made Easy — Sky & Telescope~~

## Access Free How To Polar Align Your Nexstar 8i

Align the polar scope reticule. Remove the dust caps from either end of Right Ascension RA, axis, and then lower the countershaft bar and rotate the Declination axis so that you can see through the polar scope. Check bisection on RA axis through compass, the line that is falling on a faraway object in the horizon.

### ~~How to Polar Align a Telescope During the Day?~~ OpticsGuides

Manually align the polar axis (by moving the tripod and then the fine up/down, left-right controls) until, crouching down under the

## Access Free How To Polar Align Your Nexstar 8i

mount, you can see Polaris in the field of view of the polar finder scope. Then adjust your mount's up/down and left/right fine controls until Polaris is in the spot indicated.
