## Desiccant Air Dryer

Ingersoll Rand's line of TURBO-DRI™ desiccant dryers is the result of our unending pursuit to create the most reliable desiccant dryers you can operate. Our developments have set many new standards and new expectations industry-wide. Advanced Design for Optimum Operation and Superior Reliability Flexible choices for clean, dry air

Desiccant Air Dryers -  
Ingersoll Rand Products  
HL heatless desiccant dryers use twin desiccant towers with strategically positioned valves to dry compressed air. The simple

# File Type PDF Ingersoll Rand Desiccant Air Dryer

## Technology of Heatless

dryers divert a portion of dried compressed air to an off-line tower. The dry air then flows through and regenerates desiccant.

Although operating costs run higher than the heated desiccant dryers, the HL series requires the lowest capital investment.

Heatless Desiccant Dryers  
2.5-142 m<sup>3</sup>/min, 800-5,000  
cfm

A compressor dryer is an integral piece in your air treatment system, making Ingersoll Rand's wide knowledge and expertise in this field a key aspect to the success of your

Heated Blower Desiccant Dryers 4.2-226 m<sup>3</sup>/min, 150-8,000 cfm. View all models. Heated blower desiccant dryers utilize a high performance centrifugal

# File Type PDF Ingersoll Rand Desiccant Air Dryer

blower to direct ambient air through a heater and the off-line tower to regenerate desiccant. Although heated blower technology requires the highest initial capital investment, it offers significantly lower operating costs than other desiccant dryer technologies because there is little to no loss of compressed air from the system for regeneration.
