The 50,000-100,000 mile change interval is much more common in most cars today. Even manual vehicles are able to go farther with modern gear oils than they used to back in the day, and even vehicles used for towing are beginning to push the 50,000 mile mark because of more advanced technology and better formulas.

How Often Should You Change Transmission Fluid? A Guide to ...

Manual: Most manufacturers recommend that manual transmission fluid be changed every 30,000 to 60,000 miles. Under heavy-duty use, some manufacturers suggest changing transmission fluid every 15,000 miles. Automatic: Service intervals for an automatic transmission vary from every 30,000 miles ... to never. The typical service interval is 60,000 to 100,000 miles.

Transmission Fluid | Car Talk

However Milner's would recommend that you change annually, just like you would with your engine oil and filters. Manual: Many manufacturers recommend that manual transmission fluid be changed every 30,000 to 60,000 miles. Although if you check your owners manual, it will advise your vehicles recommendation.

How Often Should I Change My Gearbox Filter And Oil ...

The first thing to bear in mind is that over-doing it with automatic gearbox oil changes is never a bad thing. You won't harm your transmission by changing the oil more often than the manufacturer recommends. The low end for an automatic transmission fluid change interval is around 30,000 miles (a little under 50,000 km).

How Often Do You Need to Change Your Automatic ...

100,000 miles used to be a decent fluid change interval on a manual transmission. The gear oil, on an atomic level, is made of long-chain molecules that prevent wear by literally keeping the gear teeth from contacting each other. Over the thousands of miles of driving the shearing action of the gear teeth tends to chew up these long chain molecules.
