Step 1: A problem involving work can be solved using the formula , where T = time working together, A = the time for person A working alone, and B = the time for person B working alone. In this case, one pipe is filling the pool and the

Online Library Problems And

other is emptying the pool so we get the equation: Step 2: Solve the equation created in the first step.

~~Solving Problems Involving Work~~

It is possible to
solve word
problems when two
people are doing a
work job together
by solving systems
of equations. To
solve a work word

Online Library Problems And

Worked, multiply the hourly rate of the two people working together by the time spent working to get the total amount of time spent on the job. Knowledge of solving systems of equations is necessary to solve these types of problems.
